

Clairvoyant Angelic Healing and The Planetary Archetypes

By Peter Selby, RPT (MT)

We commonly reference *Planetary Archetypal Symbols* in our Clairvoyant Angelic Healing practice and it makes for efficient communication with Angels - as in "a picture is worth a thousand words."

The meanings of Planetary Archetypes are well established - they have been largely agreed on for thousands of years and their use stretches back to even before they were assimilated into the Greek pantheon as the God Mars or Saturn or Pluto etc. We began referencing them in our work with clients in 2002 after *the Angels showed Peter a compelling vision* of their location in the Aura while working with clients in Ft. Lauderdale Fla. Prior to that moment, Peter had little or no knowledge of their meaning and would not have begun to imagine their future importance to this work.

Interestingly, the vision occurred while working with a client who happened to be a professional astrologer and she immediately offered to go home and print off the physiological correlations in the human body of each planetary energy. Go figure! The Angels really know what they are doing and they made a score that day.

Having been guided to incorporate the planets in our work with Angels, we can now be cued by Angels to speak to a person about different "departments" or functions within their consciousness. For instance, if Angels want to tell us something about a person's core spirit or essence, about their will to be themselves and to pursue their life purpose with authenticity and authority, they will show the symbol of the *SUN*. *SUN* is about a person's core identity and nobility. It brings about enlightenment and higher inspiration. Angels quite often point to a person's *SUN* and offer to heal blockages in this fundamentally important area of *consciousness*.

We can deduce various meanings depending on its location in the Aura. In terms of the effect of the *SUN* on body physiology, it affects a person's core energy, their heart, spleen, the adrenal glands, the back (especially the upper back), arteries and circulation in general, and the eyes (especially the right eye of a male and the left eye of a woman). *THE EFFECT* of healing the *SUN* quality in one's consciousness is *LIFE CHANGING* and it also can powerfully heal the body. Angels can empower a person to activate and heal their *SUN* and of course, this is equally true with all the other planetary archetypes.
